SUBSIDIARIES
CONSOLIDATED FINANCIAL STATEMENTS AND
INDEPENDENT AUDITORS' REVIEW REPORT
JUNE 30, 2026 AND 2025**

For the convenience of readers and for information purposes only, the auditors' report and the accompanying consolidated financial statements have been translated into English from the original Chinese version prepared and used in the Republic of China. In the event of any discrepancy between the English version and the original Chinese version or any differences in the interpretation of the two versions, the Chinese-language auditors' report and consolidated financial statements shall prevail.

Independent Auditors' Review Report Translated from Chinese

To the Board of Directors and Shareholders of Cosmo Electronics Corporation

Introduction

We have reviewed the accompanying consolidated financial statements of Cosmo Electronics Corporation and its subsidiaries, which comprise the consolidated balance sheets as at June 30, 2026 and 2025; the related consolidated statements of comprehensive income for the three-month and six-month periods then ended; the related consolidated statements of changes in equity and cash flows for the six-month periods then ended; and the notes to the consolidated financial statements, including a summary of significant accounting policies.

Management is responsible for the preparation and fair presentation of these consolidated financial statements in accordance with the Regulations Governing the Preparation of Financial Reports by Securities Issuers and International Accounting Standard 34, "Interim Financial Reporting" as endorsed and issued into effect by the Financial Supervisory Commission. Our responsibility is to express a conclusion on these consolidated financial statements based on our reviews.

Scope of Review

Except as explained in the Basis for Qualified Conclusion, we conducted our reviews in accordance with the Standard on Review Engagements 2410, "Review of Financial Information Performed by the Independent Auditor of the Entity" of the Republic of China. A review of consolidated financial statements consists of making inquiries, primarily of persons responsible for financial and accounting matters, and applying analytical and other review procedures. A review is substantially less in scope than an audit and consequently does not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. Accordingly, we do not express an audit opinion.

Basis for Qualified Conclusion

As explained in Notes 4(3) to the consolidated financial statements, the financial statements of certain non-significant subsidiaries included in the consolidated financial statements referred to in the first paragraph were not reviewed by independent auditors. Those statements reflect total assets of NT\$454,355 thousand and NT\$201,561 thousand, constituting 10% and 5% of the consolidated total assets, and total liabilities of NT\$389,968 thousand and NT\$82,947 thousand, constituting 14% and 4% of the consolidated total liabilities as at June 30, 2026 and 2025, respectively, and total comprehensive income (loss) of NT\$153,195 thousand, NT\$(387,232) thousand, NT\$150,861 thousand and NT\$(412,528) thousand, constituting (153)%, 81%, (215)% and 75% of the consolidated total comprehensive income (loss) for the three-month and six-month periods then ended, respectively.

Qualified Conclusion

Except for the adjustments to the consolidated financial statements, if any, as might have been determined to be necessary had the financial statements of certain consolidated subsidiaries been reviewed by independent auditors, that we might have become aware of had it not been for the situation described above, based on our reviews, nothing has come to our attention that causes us to believe that the accompanying consolidated financial statements do not present fairly, in all material respects, the consolidated financial position of Cosmo Electronics Corporation and its subsidiaries as at June 30, 2026 and 2025, and its consolidated financial performance for the three-month and six-month periods ended June 30, 2026 and 2025, and its consolidated cash flows for the six-month periods then ended, in accordance with the Regulations Governing the Preparation of Financial Reports by Securities Issuers and International Accounting Standard 34, “Interim Financial Reporting” as endorsed and issued into effect by the Financial Supervisory Commission.

The accompanying consolidated financial statements are not intended to present the financial position, results of operations and cash flows in accordance with accounting principles generally accepted in countries and jurisdictions other than the Republic of China. The standards, procedures and practices in the Republic of China governing the audit of such consolidated financial statements may differ from those generally accepted in countries and jurisdictions other than the Republic of China. Accordingly, the accompanying consolidated financial statements and independent auditors' report are not intended for use by those who are not informed about the accounting principles or auditing standards generally accepted in the Republic of China, and their applications in practice.

For the convenience of readers and for information purposes only, the auditors' report and the accompanying consolidated financial statements have been translated into English from the original Chinese version prepared and used in the Republic of China. In the event of any discrepancy between the English version and the original Chinese version or any differences in the interpretation of the two versions, the Chinese-language auditors' report and consolidated financial statements shall prevail.

COSMO ELECTRONICS CORPORATION AND SUBSIDIARIES
NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS
FOR THE SIX-MONTH PERIODS ENDED JUNE 30, 2026 AND 2025
(Expressed in thousands of New Taiwan dollars, except as otherwise indicated)

1. History and Organization

Cosmo Electronics Corporation (“The Company”) was established in May 1981. The Company and its subsidiaries (collectively referred herein as the “Group”) are primarily engaged in manufacture and sales of relays, photocouplers and LEDs, clean steam and land development business, etc. The Company's shares have been traded on the Taipei Exchange (OTC) since January 15, 2000, and were listed on the Taiwan Stock Exchange (TWSE) on September 17, 2001.

2. The Date of Authorization for Issuance of the Consolidated Financial Statements and Procedures for Authorization

These consolidated financial statements were authorized for issuance by the Board of Directors on August 7, 2026.

3. Application of New, Amended and Revised Standards and Interpretations

(1) Application of the amendments to the International Financial Reporting Standards (IFRS), International Accounting Standards (IAS), IFRIC Interpretations (IFRIC), and SIC Interpretations (SIC) (collectively, “IFRSs”) endorsed and issued into effect by the Financial Supervisory Commission (FSC)

The application of the amended/revised IFRSs Accounting Standards endorsed and issued into effect by the FSC did not have material impact on the Company’s accounting policies.

(2) The IFRS Accounting Standards endorsed by the FSC for application starting from 2026

New Standards, Interpretations and Amendments	Effective date by International Accounting Standards Board
Amendments to IFRS 9 and IFRS 7 “Amendments to the Classification and Measurement of Financial Instruments”	January 1, 2026
Amendments to IFRS 9 and IFRS 7 “Contracts Referencing Nature-dependent Electricity”	January 1, 2026
Annual Improvements to IFRS Accounting Standards - Volume	January 1, 2026

As of the date the accompanying consolidated financial statements were issued, the Group continues in evaluating other impacts of the above amended standards and on its financial position and

financial performance from the aforementioned standards or interpretations and amendments. The related impact will be disclosed when the Group completes its evaluation.

(3) The IFRSs Accounting Standards issued by IASB, but not yet endorsed and issued into effect by the FSC

New Standards, Interpretations and Amendments	Effective date by International Accounting Standards Board (Note 1)
Amendments to IFRS 10 and IAS 28 “Sale or Contribution of Assets between an Investor and its Associate or Joint Venture”	To be determined by IASB
IFRS 18 “Presentation and Disclosure in Financial Statements”	January 1, 2027 (Note 2)
IFRS 19 “Subsidiaries without Public Accountability: Disclosures”	January 1, 2027
IFRS 20 “Regulatory Assets and Regulatory Liabilities”	January 1, 2029
Amendments to IFRS 21 “Translation to a Presentation Currency in a Hyperinflationary Presentation Currency”	January 1, 2027
Amendments to IFRS 28 “Amendments to the Fair Value Option for Investments in Associates and Joint Ventures”	January 1, 2027 (Note 3)

Note 1: Unless stated otherwise, the above IFRS Accounting Standards are effective for annual reporting periods beginning on or after their respective effective dates.

Note 2: In a press release dated September 25, 2025, the FSC announced that public companies will be required to apply International Financial Reporting Standard 18 (“IFRS 18”) beginning in fiscal year 2028. Entities may elect early application after the FSC endorses IFRS 18.

Note 3: The amendments are effective when an entity first applies IFRS 18.

As of the date the accompanying consolidated financial statements were authorized for issuance, the Group continues to evaluate the impact of the aforementioned standards, interpretations, and amendments on its financial position and financial performance. The related impact will be disclosed upon completion of the evaluation.

4. Summary of Significant Accounting Policies

The principal accounting policies applied in the preparation of these consolidated financial statements are set out below. These policies have been consistently applied to all the periods presented, unless otherwise stated.

(1) Compliance statement

The accompanying consolidated financial statements have been prepared in conformity with the Regulations Governing the Preparation of Financial Reports by Securities Issuers and IAS 34, “Interim Financial Reporting,” endorsed and issued into effect by the FSC. The consolidated financial statements do not present all the disclosures required for a complete set of annual consolidated financial statements prepared under the IFRS Accounting Standards endorsed and issued into effect by the FSC.

(2) Basis of preparation

The accompanying consolidated financial statements have been prepared on the historical cost basis except for financial instruments that are measured at fair values. For assets, historical cost refers to the fair value of the cash, cash equivalents, or other consideration paid to acquire the asset; for liabilities, it refers to the amount received when the obligation is incurred or the amount expected to be paid to settle the liability.

(3) Basis of consolidation

A. Basis for preparation of consolidated financial statements:

- (a) All subsidiaries are included in the Group's consolidated financial statements. Subsidiaries are all entities (including structured entities) controlled by the Group. The Group controls an entity when the Group is exposed, or has rights, to variable returns from its involvement with the entity and has the ability to affect those returns through its power over the entity. Consolidation of subsidiaries begins from the date the Group obtains control of the subsidiaries and ceases when the Group loses control of the subsidiaries.
- (b) Inter-company transactions, balances and unrealized gains or losses on transactions between companies within the Group are eliminated. Accounting policies of subsidiaries have been adjusted where necessary to ensure consistency with the policies adopted by the Group.
- (c) Profit or loss and each component of other comprehensive income are attributed to the owners of the parent and to the non-controlling interests. Total comprehensive income is attributed to the owners of the parent and to the non-controlling interests even if this results in the non-controlling interests having a deficit balance.
- (d) Changes in a parent's ownership interest in a subsidiary that do not result in the parent losing control of the subsidiary (transactions with non-controlling interests) are accounted for as equity transactions, i.e., transactions with owners in their capacity as owners. Any difference between the amount by which the non-controlling interests are adjusted and the fair value of the consideration paid or received is recognized directly in equity.

- (e) When the Group loses control of a subsidiary, the Group remeasures any investment retained in the former subsidiary at its fair value. That fair value is regarded as the fair value on initial recognition of a financial asset or the cost on initial recognition of the associate or joint venture. Any difference between fair value and carrying amount is recognized in profit or loss. All amounts previously recognized in other comprehensive income in relation to the subsidiary are reclassified to profit or loss on the same basis as would be required if the related assets or liabilities were disposed of. That is, when the Group loses control of a subsidiary, all gains or losses previously recognized in other comprehensive income in relation to the subsidiary should be reclassified from equity to profit or loss, if such gains or losses would be reclassified to profit or loss when the related assets or liabilities are disposed of.

Note 1: The Group's aggregate investment in this subsidiary is 100%.

Note 2: The financial statements of the entity as of June 30, 2026 and for the six-month period then ended were not reviewed by independent auditors because the entity was not a significant subsidiary.

Note 3: The organizational structure was changed and is now 100% owned by Cosmo Electronics Corporation in 2025.

Note 4: The subsidiary was approved for incorporation on April 11, 2025, and is 100% owned by Cosmo Electronics Corporation.

Note 5: The Board of Directors approved capital increases of USD 800 thousand and USD 1,420 thousand in Grand Concept Group Limited in 2026 and 2025, respectively; the Company's shareholding ratio remains unchanged at 100%.

Note 6: In 2026 and 2025, the Board of Directors of Grand Concept Group Limited approved capital injections of USD 800 thousand and USD 1,420 thousand, respectively, in True Glory Investments Limited. The Company's ownership interest in True Glory Investments Limited remained at 100%.

Note 7: In 2026 and 2025, the Board of Directors of True Glory Investments Limited approved capital injections of USD 800 thousand and USD 1,420 thousand, respectively, in Pt Cijambe Indah. The Company's ownership interest in Pt Cijambe Indah remained at 95%.

C. Subsidiaries that have non-controlling interests that are material to the Group: None.

D. The financial statements of certain subsidiaries included in the consolidated financial statements were prepared by those subsidiaries and were not reviewed by independent auditors. The total assets of these subsidiaries amounted to NT\$454,355 thousand and NT\$201,561 thousand as of June 30, 2026 and 2025, respectively, and their total liabilities amounted to NT\$389,968 thousand and NT\$82,947 thousand as of the same dates, respectively. Their total comprehensive income (loss) for the three-month periods ended June 30, 2026 and 2025 and the six-month periods ended June 30, 2026 and 2025 amounted to NT\$153,195 thousand, NT\$(387,332) thousand, NT\$150,861 thousand and NT\$(412,528) thousand, respectively.

(4) Foreign currency

In preparing the consolidated financial statements, transactions in currencies other than the entity's functional currency (foreign currencies) are recognized at the rates of exchange prevailing at the dates of the transactions. At the end of each reporting period, monetary items denominated in foreign currencies are retranslated at the closing rates prevailing at that date. Such exchange differences are recognized in profit or loss in the period in which they arise. Non-monetary items measured at fair value that are denominated in foreign currencies are retranslated at the rates prevailing at the date when the fair value was determined. Exchange differences arising on the retranslation of non-monetary items are recognized in profit or loss, except for exchange differences arising on the retranslation of non-monetary items in respect of which gains and losses are recognized in other comprehensive income, in which case, the exchange differences are also recognized in other comprehensive income. Non-monetary items that are measured in terms of historical cost in foreign currencies are not retranslated.

For the purposes of presenting consolidated financial statements, the assets and liabilities of the Group's foreign operations are translated into NT\$ using the closing exchange rates prevailing at the end of each reporting period. Income and expense items are translated at the average exchange rates for the period. Exchange differences arising, if any, are recognized in other comprehensive income and accumulated in equity under the heading of "exchange differences on translation of foreign financial statements" (and attributed to non-controlling interests as appropriate).

(5) Classification of Current and Noncurrent Assets and Liabilities

Current assets include cash and cash equivalents (unless the asset is restricted from being exchanged or used to settle a liability for at least 12 months after the reporting period), assets held primarily for the purpose of trading, assets expected to be realized or consumed within 12 months after the reporting period, or expected to be realized, sold, or consumed within the Group's normal operating cycle. Assets that are not classified as current are noncurrent assets.

Current liabilities include liabilities held primarily for trading purposes, liabilities that are expected to be settled within twelve months after the reporting period or within the entity's normal operating cycle, and liabilities for which the Group does not have an unconditional right to defer settlement for at least twelve months after the reporting period. Liabilities that are not classified as current liabilities are classified as non-current liabilities.

(6) Cash and Cash Equivalents

Cash equivalents refer to short-term, highly liquid investments that are readily convertible to known amounts of cash and subject to an insignificant risk of changes in value. Time deposits that meet the above criteria and are held to meet short-term cash commitments for operating purposes are classified as cash equivalents.

(7) Financial Instruments

Financial assets and financial liabilities are recognized when the Group becomes a party to the contractual provisions of the instruments.

Financial assets and financial liabilities are initially measured at fair value. Transaction costs that are directly attributable to the acquisition or issuance of financial assets and financial liabilities (other than financial assets and financial liabilities at FVTPL) are added to or deducted from the fair value of the financial assets or financial liabilities, as appropriate, on initial recognition. Transaction costs are directly attributable to the acquisition of financial assets or financial liabilities at FVTPL are recognized immediately in profit or loss.

A. Financial assets

All regular way purchases or sales of financial assets are recognized and derecognized on a trade date basis.

(a) Measurement category

Financial assets are classified into financial assets at amortized cost.

Financial assets that meet the following conditions are subsequently measured at amortized cost:

- i. The financial asset is held within a business model whose objective is to hold financial assets in order to collect contractual cash flows.
- ii. The contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

Subsequent to initial recognition, financial assets at amortized cost, including accounts receivable at amortized cost, other receivable, and refundable deposits, are measured at amortized cost, which equals the gross carrying amount determined using the effective interest method less any impairment loss. Exchange differences are recognized in profit or loss in the period in which they arise.

The Group's time deposits which do not fall under cash equivalents are those with a short maturity period and are measured at initial investment amount as the effect of discounting is immaterial.

(b) Impairment of financial assets

The Group recognizes a loss allowance for expected credit losses on financial assets at amortized cost (including accounts receivable).

The Group always recognizes lifetime expected credit losses (ECLs) for accounts receivable and other receivable. For all other financial instruments, the Group recognizes lifetime ECLs when there has been a significant increase in credit risk since initial recognition. If, on the other hand, the credit risk on a financial instrument has not increased significantly since initial recognition, the Group measures the loss allowance for that financial instrument at an amount equal to 12-month ECLs.

Expected credit losses reflect the weighted average of credit losses with the respective risks of default occurring as the weights. Lifetime ECLs represent the expected credit losses that will

result from all possible default events over the expected life of a financial instrument. In contrast, 12-month ECLs represent the portion of lifetime ECLs that is expected to result from default events on a financial instrument that are possible within 12 months after the reporting date.

The impairment loss of all financial assets is recognized in profit or loss by a reduction in their carrying amounts through a loss allowance account.

(c) Derecognition of financial assets

The Group derecognizes a financial asset only when the contractual rights to the cash flow expire or when it transfers the financial asset and substantially all the risks and rewards of ownership of the asset to another party.

B. Financial liabilities

(a) Subsequent measurement

All financial liabilities are measured at amortized cost using an effective interest method.

(b) Derecognition of financial liabilities

The difference between the carrying amount of the financial liability derecognized and the consideration paid, including any noncash assets transferred or liabilities assumed, is recognized in profit or loss.

(8) Inventories

Inventories consist of raw materials, finished goods and work in process. The cost of finished goods and work in progress comprises raw materials, direct labor, other direct costs and related production overheads. It excludes borrowing costs. Inventories are stated at the lower of cost and net realizable value. Inventory write-downs are made by item, except where it may be appropriate to group similar or related items. Net realizable value is the estimated selling price in the ordinary course of business, less the estimated cost of completion and applicable variable selling expenses. Inventories are recorded at weighted-average cost.

(9) Non-current assets held for sale

Non-current assets (or disposal groups) are classified as held for sale if their carrying amount is recovered principally through a sale transaction rather than through continuing use. This condition is met only when the non-current asset (or disposal group) is available for immediate sale in its present condition and its sales are highly probable.

For the sale to be highly probable, the appropriate level of management must be committed to a plan to sell the assets, and the sale should be expected to be completed within one year from the date of classification.

Non-current assets (or disposal groups) classified as held for sale are measured at the lower of their carrying amount and fair value less costs to sell. Depreciation of such assets ceases upon classification as held for sale.

(10) Property, plant and equipment

Property, plant and equipment are measured at cost less accumulated depreciation and accumulated impairment. Cost is measured as the amount of cash or cash equivalents paid, or the fair value of other consideration given, to acquire an asset at the time of its acquisition or construction, including the estimated costs of dismantling and removing the asset. It also includes an initial estimate of the costs of dismantling and removing the assets and restoring the site on which it is located. When significant parts of an item of property, plant and equipment have different useful lives, they are accounted for as separate components and depreciated individually over their respective useful lives.

Depreciation is calculated on the depreciable amount, which is the cost of an asset (or other amount substituted for cost) less its residual value. Depreciation is recognized on a straight-line basis over the estimated useful lives of the individual components of items of property, plant and equipment.

Assets held under finance leases are depreciated on the same basis as owned assets over their expected useful lives. However, if the lease term is shorter than the asset's useful life, depreciation is charged over the lease term.

The estimated useful lives, residual values, and depreciation methods are reviewed at the end of each reporting period. Any changes are accounted for prospectively from the date of the revision.

The cost of replacing a part of an item of property, plant and equipment is recognized in the carrying amount of the asset if it is probable that the future economic benefits associated with the part will flow to the Group and the cost of the part can be measured reliably. The carrying amount of the replaced part is derecognized. The costs of day-to-day servicing of property, plant and equipment are recognized in profit or loss as incurred.

Gains or losses arising from the disposal or retirement of items of property, plant and equipment are determined as the difference between the disposal proceeds and the carrying amount of the asset and are recognized net within other gains and losses in profit or loss.

(11)Investment property

An investment property is stated initially at its cost and measured subsequently using the fair value model. A gain or loss arising from a change in the fair value of investment property is recognized in profit or loss.

(12)Intangible assets

A. Computer software

Computer software is stated at cost and amortized on a straight-line basis over its estimated useful life of 3 to 5 years.

B. Patent

Patent is stated at cost and amortized on a straight-line basis over its useful life of 20 years.

(13)Impairment of Tangible Assets and Intangible Assets

The Company and its subsidiaries assess at the end of each reporting period whether there is any indication that property, plant and equipment and intangible assets with finite useful lives may be impaired. If any such indication exists, the recoverable amount of the asset is estimated in order to determine the extent of the impairment loss, if any. Intangible assets with indefinite useful lives are tested for impairment annually, and whenever there is an indication that the asset may be impaired. If it is not possible to estimate the recoverable amount of an individual asset, the recoverable amount of the cash-generating unit to which the asset belongs is determined. For assets that do not generate largely independent cash inflows, the recoverable amount is estimated for the smallest group of cash-generating units that includes the asset and for which a reasonable and consistent allocation basis can be identified.

Recoverable amount is the higher of fair value less costs to sell and value in use. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset for which the estimates of future cash flows have not been adjusted.

For contracts with customers within the scope of IFRS 15, inventories, property, plant and equipment, and intangible assets recognized in relation to such contracts are first assessed for impairment in accordance with the respective impairment requirements applicable to those assets. Subsequently, an impairment loss is recognized for contract cost assets if the carrying amount of the asset exceeds the remaining amount of consideration expected to be received in exchange for the goods or services to which the asset relates, less the costs that relate directly to fulfilling the contract and have not been recognized as expenses. After the above assessments, if applicable, the carrying amount of contract

cost assets is included in the carrying amount of the cash-generating unit to which they belong, and the recoverable amount of the cash-generating unit is assessed for impairment accordingly.

If the recoverable amount of an asset or cash-generating unit is estimated to be less than its carrying amount, the carrying amount of the asset or cash-generating unit is reduced to its recoverable amount. An impairment loss is recognized immediately in profit or loss. When an impairment loss subsequently reverses, the carrying amount of the asset or a cash-generating unit is increased to the revised estimate of its recoverable amount, but the increased carrying amount does not exceed the carrying amount that would have been determined had no impairment loss been recognized for the asset or cash-generating unit in prior years. A reversal of an impairment loss is recognized immediately in profit or loss.

(14) Leasing arrangements (lessee) — right-of-use assets/ lease liabilities

- A. Leases are recognized as a right-of-use asset and a corresponding lease liability at the date at which the leased asset is available for use by the Company and its subsidiaries. For short-term leases or leases of low-value assets, lease payments are recognized as an expense on a straight-line basis over the lease term.
- B. Lease liabilities include the net present value of the remaining lease payments at the commencement date, discounted using the incremental borrowing interest rate. Lease payments are fixed payments, less any lease incentives receivable.
- C. The Company and its subsidiaries subsequently measure the lease liability at amortized cost using the interest method and recognizes interest expense over the lease term. The lease liability is remeasured, and the amount of remeasurement is recognized as an adjustment to the right-of-use asset when there are changes in the lease term or lease payments and such changes do not arise from contract modifications.
- D. At the commencement date, the right-of-use asset is stated at cost comprising the following:
 - (a) The amount of the initial measurement of lease liability;
 - (b) Any initial direct costs incurred by the lessee.
- E. The right-of-use asset is measured subsequently using the cost model and is depreciated from the commencement date to the earlier of the end of the asset's useful life or the end of the lease term. When the lease liability is remeasured, the amount of remeasurement is recognized as an adjustment to the right-of-use asset.
- F. For lease modifications that decrease the scope of the lease, the lessee shall decrease the carrying amount of the right-of-use asset and remeasure the lease liability to reflect the partial or full termination of the lease and recognize the difference in profit or loss.

(15)Borrowings

Borrowings comprise long-term and short-term bank borrowings. Borrowings are recognized initially at fair value, net of transaction costs incurred. Borrowings are subsequently stated at amortized cost; any difference between the proceeds (net of transaction costs) and the redemption value is recognized in profit or loss over the period of the borrowings using the effective interest method.

(16)Employee benefits

A. Short-term employee benefits

Short-term employee benefits are measured at the undiscounted amount of the benefits expected to be paid in respect of service rendered by employees in a period and should be recognized as expense in that period when the employees render service.

B. Pensions

(a) Defined contribution plans

For defined contribution plans, the contributions are recognized as pension expense when they are due on an accrual basis. Prepaid contributions are recognized as an asset to the extent of a cash refund or a reduction in future payments.

(b) Defined benefit plans

- i. Net obligation under a defined benefit plan is defined as the present value of the pension benefits that employees will receive on retirement for their services with the Company and its subsidiaries in current or prior periods. The liability recognized in the balance sheet in respect of defined benefit pension plans is the present value of the defined benefit obligation at the balance sheet date less the fair value of plan assets. The net defined benefit obligation is calculated annually by independent actuaries using the projected unit credit method. The rate used to discount is determined by reference to market yields on government bonds (at the balance sheet date) of a currency and term consistent with the currency and term of employment benefit obligations.
- ii. Remeasurements arising on defined benefit plans are recognized in other comprehensive income in the period in which they arise and are recorded as other equity.
- iii. Past service costs are recognized immediately in profit or loss.

C. Employees' compensation and directors' remuneration

Employees' compensation and directors' remuneration are recognized as expense and liability, provided that such recognition is required under legal or constructive obligation, and the amounts can be reliably estimated. Any difference between the resolved amounts and the subsequent actual distributed amounts is accounted for as changes in estimates. If employee compensation is paid in shares, the Company and its subsidiaries calculate the number of shares based on the closing price of the day preceding the board meeting resolution.

(17)Income tax

Income tax expense includes both current and deferred income tax.

Except for income tax related to business combinations or recognized directly in equity or other comprehensive income, both current and deferred income tax expenses are recognized in profit or loss. Current income tax expense is calculated based on the tax rate that has been enacted or substantively enacted by the end of the reporting period, applied to the taxable income or loss for the year, and any adjustments to income taxes payable or receivable in respect of prior years.

Deferred income tax expense is recognized based on temporary differences between the tax bases of assets and liabilities and their carrying amounts for financial reporting purposes.

The current income tax expense is calculated on the basis of the tax laws enacted or substantively enacted at the balance sheet date in the countries where the Company and its subsidiaries operate and generate taxable income. Management periodically evaluates positions taken in tax returns with respect to situations in accordance with applicable tax regulations. It establishes provisions where appropriate based on the amounts expected to be paid to the tax authorities. An additional tax is levied on the Company's unappropriated retained earnings and is recognized as income tax expense in the year following the earnings generation, upon the resolution of the shareholders' meeting to distribute the earnings, based on the actual distribution.

Deferred income tax assets and liabilities are measured using the tax rates expected to apply when the temporary differences reverse, based on the tax rates that have been enacted or substantively enacted by the end of the reporting period.

Deferred income tax assets and liabilities are offset only when there is a legally enforceable right to set off current tax assets against current tax liabilities, and the assets and liabilities relate to income taxes levied by the same taxation authority on the same taxable entity; or if the entities are different, when there is an intention to settle on a net basis, or when the deferred tax liabilities and assets will be realized simultaneously.

Deferred income tax assets are recognized for unused tax losses, tax credits, and deductible temporary differences, to the extent that it is probable that there will be future taxable income available for

utilization. These assets are reassessed at the end of each reporting period, and if it is not probable that the related income tax benefits will be realized, they are adjusted accordingly.

An additional tax of the Company is levied on the unappropriated retained earnings and is recorded as income tax expense in the year the stockholders resolve to retain their earnings.

(18)Revenue recognition

Sales of goods

- A. The Company and its subsidiaries manufacture and sell a range of electronic products such as photocouplers and relays. Sales are recognized when control of the products has transferred, being when the products are delivered to the customer, the customer has full discretion over the channel and price to sell the products, and there is no unfulfilled obligation that could affect the customer's acceptance of the products. Delivery occurs when the products have been shipped to the specific location, the risks of obsolescence and loss have been transferred to the customer, and either the customer has accepted the products in accordance with the sales contract, or the Company and its subsidiaries have objective evidence that all criteria for acceptance have been satisfied.
- B. A receivable is recognized when the goods are delivered as this is the point in time that the consideration is unconditional because only the passage of time is required before the payment is due.

Interest income

Interest income from financial assets is recognized when it is probable that the economic benefits will flow to the Group and the amount of income can be reliably measured. Interest income is accrued on a time basis by applying the effective interest method to the outstanding principal amount.

(19)Operating segments

An operating segment is a component of the Company and its subsidiaries that engages in activities from which it may earn revenue and incur expenses (including revenues and expenses arising from transactions with other components of the Company and its subsidiaries). The operating results of each segment are regularly reviewed by the Company's chief operating decision maker (the Board of Directors) to assess performance and make decisions about the allocation of resources.

5. Critical Accounting Judgements, Estimates and Key Sources of Assumption Uncertainty

The preparation of these consolidated financial statements requires management to make critical judgements in applying the Company and its subsidiaries' accounting policies and making critical assumptions and estimates concerning future events. Assumptions and estimates may differ from the actual results and are continually evaluated and adjusted based on historical experience and other factors.

Such assumptions and estimates have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year; and the related information is addressed below:

(1) Valuation of inventories

As inventories are stated at the lower of cost and net realizable value, the Company and its subsidiaries must determine the net realizable value of inventories on balance sheet date using judgements and estimates. Due to the rapid technology innovation, the Company and its subsidiaries evaluate the amounts of inventories with normal consumption, obsolescence or no market value on balance sheet date, and write down the cost of inventories to the net realizable value. The valuation of inventories is principally based on the demand for the products within the specified period in the future. Therefore, there might be material changes to the valuation.

(2) Assessment of the fair value of investment property

As the investment property is subsequently measured at fair value, the investment property held by the Company and its subsidiaries is mainly land and buildings, and experts must be entrusted to use their professional judgements and estimates to determine the fair value on the balance sheet date. The Company and its subsidiaries will adjust the cost to fair value based on the appraisal report issued by the experts. The assessment of investment property is mainly based on the reports issued by experts, so the measurement of fair value may be affected by product demand in a specific period in the future, real estate transaction prosperity, and changes in experts' judgments and estimates.

The Company and its subsidiaries grant an average credit period of 30 to 180 days for sales transactions, and no interest is charged on accounts receivable. The Company and its subsidiaries apply the simplified approach under IFRS 9 to recognize an allowance for expected credit losses (ECL) on accounts receivable over their lifetime. The lifetime ECL is estimated by considering the customers' historical default records and current financial condition. Based on the historical experience of credit losses, there is no significant difference in the loss patterns among different customer groups. Therefore, the Company and its subsidiaries determine the credit loss rates solely based on the number of days past due.

When there is evidence indicating that a counterparty is experiencing severe financial difficulty and the Company and its subsidiaries cannot reasonably expect to recover the amount, such as when the counterparty is undergoing liquidation, the Company and its subsidiaries directly write off the related accounts receivable. However, collection activities will continue, and any amounts subsequently recovered are recognized in profit or loss.

The Company and its subsidiaries measure the allowance for accounts receivable as follows:

A. The ageing analysis of accounts receivable is as follows:

June 30, 2026

The Company and its subsidiaries entered into a sales agreement with non-related parties on January 23, 2026, to dispose of its land, buildings, machinery, and other equipment located on Ziqiang Road, Dongshan Township, Yilan County. Accordingly, such assets have been classified as a disposal group held for sale.

On January 23, 2026, the Company entered into an agreement to dispose of the aforementioned non-current assets held for sale to an unrelated party for a total contract price of NT\$118,000 thousand. The transfer of ownership for the real estate property was completed on March 4, 2026, and all sale proceeds have been fully collected. Net of related disposal costs, a gain on disposal of NT\$74,310 thousand was recognized.

A. Depreciation is calculated based on the following estimated useful lives:

Buildings and structures	8 ~ 55	Years
Machinery	2 ~ 10	Years
Transportation equipment	5 ~ 8	Years
Office equipment	3 ~ 10	Years
Other equipment	2 ~ 10	Years

B. Information about the property, plant and equipment that were pledged to others as collateral is provided in Note 8.

(7) Leasing arrangements — lessee

- A. The Company and its subsidiaries lease various assets including land, buildings and structures. Rental contracts are typically made for periods of 2 to 55 years. Lease terms are negotiated on an individual basis and contain a wide range of different terms and conditions. The lease agreements do not impose covenants, but leased assets may not be used as security for borrowing purposes.
- B. Leases for dormitories and company cars undertaken by the Company and its subsidiaries are short-term leases (not exceeding 12 months) or relate to low-value assets.
- C. The carrying amount of right-of-use assets and the depreciation charge are as follows:

	June 30, 2026	December 31, 2025	June 30, 2025

B. Information about the fair value of the investment property is provided in Note 12.

C. Information about the investment properties pledged as collateral is provided in Note 8.

D. PT Cosmo Technology, a subsidiary of the Group, signed a land right-of-use transfer contract with PT Cijambe Indah on September 28, 2020. The land is still in the process of transfer registration. Investment properties are measured at fair value on a recurring basis. The fair value as of December 31, 2025, was based on valuations performed on December 31, 2025, and March 9, 2026, by independent qualified professional appraisers: Mr. Tzung-Ting Hsieh of Euro-Asia Real Estate Appraisers Firm, and Mr. Kun-Lung Hsieh and Mr. Bo-Lin Chen of Zonetai Real Estate Appraisers Firm, all of whom are Certified Real Estate Appraisers in the ROC.

The fair value as of December 31, 2024, was based on valuations performed on February 7 and March 11, 2025, by Ms. Yi-Ting Lai of Euro-Asia Real Estate Appraisers Firm, and Mr. Kun-Lung Hsieh and Ms. Shao-Chi Chang of Chung Tai Real Estate Appraisers Firm, who also hold Certified Real Estate Appraiser qualifications in the ROC.

E. The fair value of the investment properties is measured using Level 3 inputs in the fair value hierarchy. Unrealized gains or losses arising from fair value adjustments to investment properties for the six months ended June 30, 2026 and 2025 were included in other gains and losses.

F. The fair value of investment properties, except for undeveloped land, was measured using the income approach. The significant assumptions used are stated as follows.

	For the Year ended December 31,	
	2025	2024
Expected future cash inflows	\$ 141,631	\$ 138,536
Expected future cash outflows	(6,411)	(5,718)
Expected future cash inflows, net	\$ 135,200	\$ 132,818
Discount rate	2.47%~2.97%	2.47%~2.72%

An increase in estimated future net cash inflows or a decrease in discount rates would result in an increase in fair value.

G. The expected future cash inflows generated by investment properties included rental income and disposal value. The rental income was extrapolated using the Company and its subsidiaries' current rental rate, while taking into account the annual rental growth rate. The income analysis covers a 10-year period. The disposal value was determined using the direct capitalization method under the income approach and deducted land value increment taxes and agency fee. The expected future cash

outflows incurred by investment properties included expenditures such as land value taxes, house taxes, insurance premiums, maintenance costs, replacement and agency fee for investment inviting. These expenditures were extrapolated on the basis of the current level of expenditures, taking into account future adjustments to the government-announced land value, the tax rate promulgated under the House Tax Act. The market rentals in the area where the investment property is located were between \$200 to \$970 per ping.

- H. As of December 31, 2025 and 2024, the discount rate was determined using the interest rate for 2-year time deposits, as posted by Chunghwa Post Co., Ltd. plus 0.75% plus any asset-specific risk premiums between 0.00% to 1.6% and 0.00% to 1.50%, respectively.
- I. The fair value of undeveloped land held by the Company and its subsidiaries in Indonesia was measured using a land development analysis. The significant assumptions used were as follows:

	For the year ended December 31	
	2025	2024
Estimated total sale price	\$ 4,268,484	\$ 3,929,759
Rate of return	17.5%	15%
Overall capital interest rate	11.88%-71.28%	11.2%-66.96%

The total sale price is estimated on the basis of the most effective use of the land or property available for sale after development is completed, while taking into account the related regulations, optimistic domestic macroeconomic prospects, local land use conditions, and market rates.

- J. The Company and its subsidiaries signed a contract on November 5, 2024, to sell 5 hectares of land in Indonesia (recognized as ‘Investment property’) for a total price of \$108,800 thousand (US\$3,400 thousand). An advance payment of \$17,280 thousand was received on the signing date. As of June 30, 2026, the transfer of ownership has not yet been completed.
- K. The Company and its subsidiaries signed a contract on January 28, 2026, to sell the land and buildings located on Sec. 2, Zhongshan Rd., Jhonghe Dist., New Taipei City (recognized as “Investment property”) for a total price of NT\$36,800 thousand. The transfer of ownership was completed on March 30, 2026, and all sale proceeds have been fully collected. Net of related disposal costs, a gain on disposal of NT\$7,010 thousand was recognized.

A. Unsecured borrowings

- (a) The repayment was completed on March 25, 2025, and the Company obtained a loan facility in the amount of NT\$700,000 thousand from a bank. The funds were used to repay the remaining balance of the syndicated loan facility with O-Bank.

The interest rate for this facility will be renegotiated every three months starting from the first drawdown date, with an increase of 0.5% in the spread. The medium-term loan is intended to repay the short-term credit facility.

- (b) Prior to the drawdown, 90% of the equity interest in PT Cijambe must be pledged to the bank Pledgor True Glory Investments Ltd. Additionally, the land use right certificate in Indonesia held by PT Cijambe must be obtained before the facility can be drawn down.
- (c) The facility will be structured into six tranches, with the first tranche due six months after the first drawdown date, and each subsequent tranche also having a six-month term. The credit facility will decrease by 7.5% in each of the first five tranches and by 62.5% in the final tranche.

During periodic reviews, compliance with the agreed-upon financial ratios will be assessed. If the Company fails to meet these financial covenants, the margin on the new drawdowns will increase by 0.25%. If, upon subsequent review, the covenants are met, the original terms of the facility may be reinstated.

B. Loan secured by real estate

- (a) On November 1, 2024, the Company entered into a seven-year secured loan agreement with Sunny Bank Ltd. and obtained a non-revolving credit facility of NT\$180,000 thousand. The facility has a seven-year term from the initial drawdown date of November 1, 2024.
- (b) On September 20, 2024, the Company's subsidiary, Cosmo Electronics Technology (Kunshan) Co., Ltd., entered into a finance lease agreement for property, plant and equipment with SCSB Leasing (China) Co., Ltd. The lease financing was provided for a loan amount of RMB 4,500 thousand, equivalent to the purchase price of the underlying asset. The obligations under the lease were settled in full on October 20, 2025.
- (c) The Company provided land and buildings as collateral (Refer to Note 8 for pledge details).
- (d) The chairman of the Company, Hsieh, Shu Chuan and substantive related parties, Tsai, Nai Chen, were the sureties of the above loan agreements in their personal names.

C. Other unsecured borrowings

- (a) On July 17, 2023, the Company entered into a three-year unsecured loan agreement with Shanghai Commercial & Savings Bank and obtained a non-revolving credit facility of US\$4,000 thousand. The facility has a three-year term from the initial drawdown date of August 28, 2023.
- (b) The facility matures at the end of the credit period. Interest is payable one month after each drawdown, and the interest rate is negotiated separately for each drawdown based on the bank's funding conditions. The interest rate was 4.78% as of June 30, 2026.

- (c) The chairman of the Company, Hsieh, Shu Chuan and substantive related parties, Tsai, Nai Chen and Tsai, Chi Hu, were the sureties of the above unsecured loan agreements in their personal names.

D. Loans from related parties

Please refer to Note 7.

(11) Net defined benefit assets (liabilities)

A.

- (a) The Company has a defined benefit pension plan in accordance with the Labor Standards Act, covering all regular employees' service years prior to the enforcement of the Labor Pension Act on July 1, 2005 and service years thereafter of employees who chose to continue to be subject to the pension mechanism under the Labor Standards Act. Under the defined benefit pension plan, two units are accrued for each year of service for the first 15 years and one unit for each additional year thereafter, subject to a maximum of 45 units. Pension benefits are based on the number of units accrued and the average monthly salaries and wages of the last 6 months prior to retirement. The Company contributes monthly an amount equal to 2% of the employees' monthly salaries and wages to the retirement fund deposited with Bank of Taiwan. The Company settled and closed its pension fund dedicated account at the Bank of Taiwan in 2025. The pension plans of subsidiaries PT Cosmo and PT Cosmo Green are classified as defined benefit plans.
- (b) The pension costs recognized under the defined benefit pension plans of the Company for the three-month periods ended June 30, 2026 and 2025, and for the six-month periods ended June 30, 2026 and 2025, were \$706 thousand, \$652 thousand, \$1,412 thousand and \$1,501 thousand, respectively.
- (c) Expected contributions to the defined benefit pension plans of the Company and its subsidiaries for the year ended December 31, 2026 amount to \$0.

B.

- (a) Effective July 1, 2005, the Company has established a defined contribution pension plan (the "New Plan") under the Labor Pension Act (the "Act"), covering all regular employees with R.O.C. nationality. Under the New Plan, the Company and its domestic subsidiaries contribute monthly an amount based on 6% of the employees' monthly salaries and wages to the employees' individual pension accounts at the Bureau of Labor Insurance. The benefits accrued are paid monthly or in lump sum upon termination of employment. The Company's subsidiaries, Cosmo Electronics Technology (KunShan) Co., Ltd., Cosmo Green Power Limited, Dong Guan Guan Zhen Xing Trading Limited, Dongguan Guanwang Electronic Technology Co., Ltd., and Guizhou Guanwang International Digicrown Electronic Technology

Co., Ltd., have defined contribution plans based on a certain percentage of employees' monthly salaries and wages.

- (b) Other overseas companies, in accordance with the retirement regulations stipulated by the local government, make provision for endowment insurance or retirement benefits based on the wages of local employees. Other than the monthly contributions, the companies have no further obligations.
- (c) The pension costs recognized under the Group's defined contribution pension plans for the three-month periods ended June 30, 2026 and 2025, and for the six-month periods ended June 30, 2026 and 2025, amounted to \$886 thousand, \$1,017 thousand, \$1,761 thousand and \$2,189 thousand, respectively.

(12) Equity

Pursuant to the R.O.C. Company Act, capital surplus arising from paid-in capital in excess of par value on issuance of ordinary shares and donations received can be used to cover accumulated deficit or to issue new stocks or cash to shareholders in proportion to their share ownership, provided that the Company has no accumulated deficit. Further, the R.O.C. Securities and Exchange Act requires that the amount of capital surplus to be capitalized mentioned above should not exceed 10% of the paid-in capital each year. Capital surplus should not be used to cover accumulated deficit unless the legal reserve is insufficient.

C. Retained earnings and dividend policy

According to the Company's Articles of Incorporation, the annual net income, if any, shall first be used to pay all taxes and offset prior years' operating losses and then 10% of the remaining amount shall be set aside as legal reserve. The remainder, if any, to be retained or to be appropriated shall be resolved by the stockholders at the stockholders' meeting.

Except for covering accumulated deficit or issuing new shares or cash to shareholders in proportion to their share ownership, the legal reserve shall not be used for any other purpose. The use of legal reserve for the issuance of stocks or cash to shareholders in proportion to their share ownership is permitted, provided that the distribution of the reserve is limited to the portion in excess of 25% of the Company's paid-in capital.

In accordance with the regulations, the Company shall set aside special reserve from the debit balance on other equity items at the balance sheet date before distributing earnings. When debit balance on other equity items is reversed subsequently, the reversed amount could be included in the distributable earnings.

On June 26, 2025, the stockholders' meeting approved the 2024 earnings distribution proposal, under which no dividends were declared.

On June 26, 2026, the stockholders' meeting approved the 2025 earnings distribution proposal, under which no dividends were declared.

B. Financial risk management policies

The Company and its subsidiaries' activities expose them to a variety of financial risks: market risk (including foreign exchange risk and interest rate risk), credit risk and liquidity risk. Risk management is carried out by the Company and its subsidiaries' Treasury Department under policies approved by the Board of Directors. The Finance Department of the Company and its subsidiaries identify, evaluate and hedge financial risks in close co-operation with the Group's operating units.

C. Market risk

(a) Foreign exchange risk

- i. The Company and its subsidiaries operate internationally and are exposed to exchange rate risk arising from the transactions of the Company and its subsidiaries used in various functional currencies, primarily with respect to the USD and RMB. Exchange rate risk arises from future commercial transactions and recognized assets and liabilities.
- ii. The Company and its subsidiaries' businesses involve some non-functional currency operations (whose functional currencies include NTD for the Company and some subsidiaries, and USD or RMB for other subsidiaries). The information on assets and liabilities denominated in foreign currencies whose values would be materially affected by the exchange rate fluctuations is as follows:

June 30, 2026	Monetary items	Foreign currency amount	Exchange rate	Book value
<u>Financial assets</u>

<u>Monetary items</u>			
USD	5%	\$ 3,529	\$ -
RMB	5%	388	-

The 5% sensitivity ratio is used internally by the Company in reporting exchange rate risk to key management personnel and also represents management's assessment of a reasonably possible range of changes in foreign exchange rates.

- iii. Total exchange gains (losses), including realized and unrealized amounts, arising from significant foreign exchange fluctuations on the monetary items held by the Company for the three-month periods ended June 30, 2026 and 2025, and for the six-month periods ended June 30, 2026 and 2025, amounted to \$(2,250) thousand, \$(31,459) thousand, \$1,173 thousand and \$(31,362) thousand, respectively.

(b) Cash flow and fair value Interest rate risk

- i. The Company and its subsidiaries' borrowings are measured at amortized cost. The borrowings are periodically contractually repriced and to that extent are also exposed to the risk of future changes in market interest rates.
- ii. As of June 30, 2026, December 31, 2025 and June 30, 2025, if the interest rates had increased or decreased by 50 basis points, with all other variables held constant, net income after tax would have decreased or increased by \$6,161 thousand, \$6,495 thousand and \$6,949 thousand, respectively. The main factor is that changes in interest expense result from floating rate borrowings.

D. Credit risk

- (a) Credit risk refers to the risk of financial loss to the Company arising from default by clients or counterparties of financial instruments on their contractual obligations. This risk primarily arises from counterparties' inability to repay contractual cash flows from accounts receivable, notes receivable, and financial assets measured at amortized cost in accordance with the agreed payment terms.
- (b) For banks and financial institutions, the Company only accepts those with good credit ratings as counterparties. According to the Company's credit policy, each local entity in the Company is responsible for managing and analyzing the credit risk for each of their new clients before standard delivery terms and conditions are offered. Internal risk control assesses the credit quality of the customers, taking into account their financial position, past experience and other factors. Individual risk limits are set based on internal or external ratings in accordance with limits set by the Board of Directors. The utilization of credit limits is regularly monitored.
- (c) The Company assumes that if contract payments are past due over 180 days based on the agreed terms, the credit risk on that financial asset is considered to have significantly increased since initial recognition. If there is evidence that the counterparty is facing severe

financial difficulties and the Company cannot reasonably expect to recover the amount, for example, the counterparty is in liquidation, the Company will directly write off the related accounts receivable, but will continue collection activities, and any amounts subsequently recovered are recognized in profit or loss.

(d) The following indicators are used to determine whether a debt instrument is credit-impaired:

- i. It becomes probable that the issuer will enter bankruptcy or other financial reorganization due to their financial difficulties;
- ii. The disappearance of an active market for that financial asset because of financial difficulties;
- iii. Default or delinquency in interest or principal repayments;
- iv. Adverse changes in national or regional economic conditions are expected to cause a default.

(e) The Company groups its accounts receivable by geographical region, product type, and customer rating characteristics, and uses a simplified approach based on a provision matrix and loss rate method to estimate expected credit losses.

E. Liquidity risk

(a) Cash flow forecasting is performed in the operating entities of the Company and aggregated by the Company's Treasury Department. Company treasury monitors rolling forecasts of the Company's liquidity requirements to ensure it has sufficient cash to meet operational needs while maintaining sufficient headroom on its undrawn committed borrowing facilities at all times so that the Company does not breach borrowing limits or covenants (where applicable) on any of its borrowing facilities. Such forecasting takes into consideration the Company's debt financing plans, covenant compliance, and compliance with internal balance sheet ratio targets.

(b) The table below analyses the Company's non-derivative financial liabilities into relevant maturity groupings based on the remaining period at the balance sheet date to the contractual maturity date. The amounts disclosed in the table are the contractual undiscounted cash flows.

F. Fair value information

- (a) The different levels that the inputs to valuation techniques are used to measure fair value of financial and non-financial instruments have been defined as follows:

Level 1: Quoted prices (unadjusted) in active markets for identical assets or liabilities that the entity can access at the measurement date. A market is regarded as active where transactions for the asset or liability take place with sufficient frequency and volume to provide pricing information on an ongoing basis. The fair value of the Company and its subsidiaries' investment in beneficiary certificates is included in Level 1.

Level 2: Inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly or indirectly. The fair value of the Company and its subsidiaries' investment in non-convertible bonds is included in Level 2.

Level 3: Unobservable inputs for the asset or liability. The fair value of the Company and its subsidiaries' investment in investment property is included in Level 3.

- (b) The related information of financial and non-financial instruments measured at fair value by level on the basis of nature, characteristics and risks of the assets and liabilities are as follows:

The related information on the basis of the nature of the assets and liabilities is as follows:

<u>June 30, 2026</u>	<u>Level 1</u>	<u>Level 2</u>	<u>Level 3</u>	<u>Total</u>

- (c) For the six months ended June 30, 2026 and 2025, there was no transfer between Level 1 and Level 2.
- (d) The movement of Level 3 for the six months ended June 30, 2026 and 2025: Please refer to Note 6(8).
- (e) The following is the qualitative information of significant unobservable inputs and sensitivity analysis of changes in significant unobservable inputs to valuation model used in Level 3 fair value measurement:

		Fair value at June 30, 2026	Valuation technique	Significant unobservable input	Range (Weighted average)	Relationship of inputs to fair value
Non-financial instruments						
Investment property	\$	2,430,338	Discounted cash flow method	Discount rate	2.47% - 2.97%	The higher discount rate, the lower fair value

Non-financial instruments						
Investment property	\$	1,927,650	Discounted cash flow method	Discount rate	2.47% - 2.72%	The higher discount rate, the lower fair value
			Land development analysis approach	Rate of return	15%	The higher rate of return, the lower the fair value
				Overall capital interest rate	11.2% - 66.96%	The higher overall capital interest rate, the lower the fair value

(2) Capital management

The Company and its subsidiaries' objectives when managing capital are to safeguard the Company and its subsidiaries' ability to continue as a going concern in order to provide returns for shareholders and to maintain an optimal capital structure to reduce the cost of capital. In order to maintain or adjust the capital structure, the Company and its subsidiaries may adjust the amount of dividends paid to shareholders, return capital to shareholders, issue new shares or sell assets to reduce debt. The Company and its subsidiaries monitor capital on the basis of the gearing ratio. This ratio is calculated as net debt divided by total capital. Net debt is calculated as total borrowings (including 'current and

non-current borrowings' as shown in the consolidated balance sheet) less cash and cash equivalents. Total capital is calculated as 'equity' as shown in the consolidated balance sheet plus net debt. The gearing ratios were as follows:

	June 30, 2026	December 31, 2025	June 30, 2025
Total borrowings	\$ 1,733,004	\$ 1,738,348	\$ 1,717,700
Less: Cash and cash equivalents	(80,455)	(215,539)	(155,604)
Net debt	1,652,549	1,522,809	1,562,096
Total equity	1,937,182	2,007,409	1,602,495
Total capital	\$ 3,589,731	\$ 3,530,218	\$ 3,164,591
Gearing ratio	46.04%	43.14%	49.36%

(3) Other matters

On February 8, 2026, the Company and its subsidiaries entered into a server sales contract with Company A for a total contract price of USD 81,600,000. Pursuant to the contract, a partial deposit of USD 8,160,000 was collected and recognized under "other payables." Concurrently, to fulfill this sales order, the Company and its subsidiaries placed a procurement order for servers with Supplier B and paid a deposit of USD 8,070,000.

However, due to Supplier B's failure to deliver the servers within the contractually agreed timeframe, the Company and its subsidiaries were unable to fulfill the sales contract with Company A.

Consequently, the contract with Company A was mutually terminated on February 10, 2026. Since Supplier B has failed to refund the procurement deposit within the payment period stipulated in the contract, the aforementioned amount of USD 8,070,000 has been reclassified under "other receivables." The Company and its subsidiaries are currently actively pursuing legal remedies and recovery actions for the said payment. The Company and its subsidiaries applied to the court for compulsory enforcement on June 29, 2026. The enforcement proceedings are ongoing.

Names, locations and other information of investee companies (not including investees in Mainland China) : Please refer to table 5.

(3) Information on investments in Mainland China

A. Basic information: Please refer to table 7.

B. Significant transactions, either directly or indirectly through a third area, with investee companies in the Mainland Area: None.

14. Segment Information

(1) General information

Management has determined the reportable operating segments based on the reports reviewed by the Board of Directors that are used to make strategic decisions.

The Company and its subsidiaries' corporate composition, the basis for segment determined and the basis for measurement of segment information have no significant change during the current year.

The reportable operating segments are as follows:

- A. Optoelectronics parts
- B. LED lighting
- C. Energy & Materials
- D. Others
- E. Industrial Park Development

(2) Segment information

The segment information provided to the chief operating decision-maker for the reportable segments is as follows:

Note 1: The numbers filled in for the loans provided by the Company or subsidiaries are as follows:

- (1) The Company is '0'.
- (2) The subsidiaries are numbered in order starting from '1'.

Note 2: The total amount of loans granted by the parent company, Cosmo Electronics Corporation, shall not exceed 40% of its net worth. For loans made to counterparties with business transactions, the individual loan amount shall not exceed the transaction amount between the two parties.

For loans made to meet short-term financing needs, the individual loan amount shall not exceed 10% of the net worth.

The total amount of loans granted by Juheng Development Corp, shall not exceed 40% of its net worth. The amount of each individual loan and the amount required for short-term financing shall be limited to 40% of net worth for one-time drawdowns, and 10% of net worth for revolving use.

Dong Guan Guan Zhen Xing Trading Limited, Real Bonus Limited, PT Cosmo Green Technology, Renown Boom Limited, Cosmo Electronics(HK) Company Limited and Dongguan Guanwang Electronic Technology Co., Ltd :

The total amount of loans shall be limited to 100% of each company's net worth; however, for short-term financing needs, the limit shall be 40% of each company's net worth. The amount of each individual loan, when provided for short-term financing needs, shall also be limited to 40% of each company's net worth.

However, for funds lent to foreign companies directly or indirectly 100% owned in voting shares by Cosmo Electronics Corporation, based on the necessity of short-term financing, the total loan amount shall not exceed 200% of each company's net worth; the amount of each individual loan shall also not exceed 200% of each company's net worth.

Cosmo Electronics Technology (KunShan) Co., Ltd.:

The total loan amount shall be limited to 20% of net worth; however, for short-term financing needs, the limit shall be 10% of each company's net worth. The amount of each individual loan for short-term financing needs shall be limited to 5% of net worth.

However, for funds lent to foreign companies directly or indirectly 100% owned in voting shares by Cosmo Electronics Corporation, based on the necessity of short-term financing, the total loan amount shall not exceed 40% of each company's net worth; and the amount of each individual loan shall not exceed 20% of each company's net worth.

Limit on total loans for financing granted by and to subsidiaries of which the ultimate parent directly or indirectly holds 100% of its voting shares is 200% of the lender's net assets based on the latest audited or reviewed financial statements, and limit on loans to each entity is 200% of the lender's net assets based on the latest audited or reviewed financial statements. However, in accordance with the Operational Procedures for Loans to Others of the Company, the total loans for financing granted by and to subsidiaries of which the ultimate parent directly or indirectly holds 100% of its voting shares must not exceed 40% of the lender's net assets based on the latest audited or reviewed financial statements, and the loans to each entity for financing must not exceed 20% of the lender's net assets based on the latest audited or reviewed financial statements. Therefore, limit on loan is the smaller one of above conditions.
